

GB Tech Wins Field Site Phone System Support Contract for DoD Inspector General

For Immediate Release: October 2, 2008

Contact: Kane Brushwood, 281.333.3703 x124, kaneb@gbtech.net

Houston, TX -- GB Tech, Inc. announced today a contract award from the Department of Defense for PBX service work at Office of Inspector General locations (DODIG). This work will consist of system Moves, Adds, and Changes and PBX service work for fifty one (51) field office locations. These systems consist of Nortel Private Branch Exchange (PBX) systems with integrated voicemail located throughout the continental United States. GB Tech was notified of the win by the DODIG the evening of September 30, 2008.

GB Tech will support this activity through the National Project Management (NPM) division within the Enterprise Business Unit and will be supplemented by other divisions of the company as needed. This capability compliments the other IT, engineering, and service related offerings that GB Tech provides for it's customers in aerospace, government, and commercial markets.

Mr. Gale Burkett, President & CEO of GB Tech stated that, "We are very pleased with the win. This division was recently acquired by our company and the supplement to our overall IT related capabilities is already paying off. We continue to increase our broad customer base which includes NASA contracts, commercial customers, municipalities, and government agencies. Our success is based on a strong focus on customer service and our quality of performance. I'm thrilled with the progress and maintain high expectations for continued success."

Kane Brushwood, Director of Project Operations for NPM, responsible for delivery of the DODIG contract said, "We look forward to providing support to our new customer that will assist the DODIG in accomplishing their mission. I believe we won this contract because we have an excellent history for customer satisfaction, a cost-effective model for unique capabilities, and a nationwide reach that will be used to support the DODIG on a 24/7 basis."
